

## **Acquisition of Oakleaf Care – Acquired Brain Injury services**

Caretech recently completed the acquisition of The Oakleaf Group, a Northampton based provider of care & support for men with Acquired Brain Injuries (ABI).

Founded in 2004, Oakleaf operates 102 beds across eight services ranging from post-acute assessment and active rehabilitation through to long stay maintenance and end of life care, as well as community based independent living.

Oakleaf extends Caretech's offering in neurological conditions and, as a specialist provider of support to people with ABI with an excellent reputation for rehabilitation and longer term care, offers a platform for further growth in this growing segment of the Health & Social Care market.
